

RIM20

Rotor Insertion Flowmeter

Description

The RIM20 multivariable insertion turbine flowmeter utilizes **three primary sensing elements** to measure the mass flowrate of steam, liquids and gases:

- Turbine velocity sensor,
- RTD temperature sensor,
- Solid-state pressure transducer.

Principle of operation

Insertion turbine flowmeters measure flow of liquid, gas, and steam by detecting the frequency of rotation of the turbine blades. According to the proven laws of physics, the frequency at which the turbine rotates is directly proportional to the flow velocity. Insertion turbine flowmeters measure flow by detecting the local velocity at a strategically located position within the pipe. The RIM20 detects the frequency within the sensor head. It uses the local velocity, along with other parameters such as fluid type, pipe size, and Reynolds Number to calculate the average pipe velocity, and consequently, the volumetric flowrate.

RIM20 range and benefits

The **RIM20-V** delivers a direct reading of volumetric flowrate, generally the most cost-effective solution for liquid flow monitoring, in applications ranging from general water flows to hydrocarbon fuel flow measurement.

The **RIM20-VT** integrates a precision 1000 Ω platinum RTD temperature sensor that can be used to calculate and output a compensated mass reading. This device is typically used to measure flowrates of saturated steam.

The **RIM20-VTP** offers you flow computer functionality in a compact field device. This multivariable instrument incorporates temperature and pressure sensors to provide an instantaneous reading of the compensated mass flowrate of gases, liquids and steam. In addition to outputs for totalized mass and alarm settings, the field-configurable electronics deliver up to three analogue 4-20 mA outputs of five process measurements, including volumetric flowrate, mass flowrate, pressure, temperature and density.

The **RIM20-EM** Energy Monitoring option permits real-time calculation of energy consumption for a facility or process. The flowmeter can be programmed to measure steam, hot water or chilled water. The RIM20-VTP flowmeter monitors one side of the process, either sent or returned, and uses the input from a second separate temperature sensor on the opposite leg of the process to calculate the change in energy. Selectable energy units include BTUs, joules, calories, Watt-hours, Megawatt-hours and Horsepower-hours. The local or remote electronics indicate two temperatures, delta T, mass total and energy total.

Sizing considerations

Piping conditions	Straight run piping requirements		Upstream	Downstream		
	One 90° elbow before the flowmeter		10 D	5 D		
	Two 90° elbows before the flowmeter		15 D	5 D		
	Two 90° elbows out of plane before the flowmeter		30 D	5 D		
	Reduction before the flowmeter		10 D	5 D		
	Expansion before the flowmeter		20 D	5 D		
	Partially open valve		30 D	5 D		
<p>D = Internal diameter of the pipe - If there is not a sufficient straight run of pipe, a flow rectifier may be used to reduce the above diameter measurements. Consult your local Spirax Sarco representative or the factory for your specific application.</p>						
Velocity range	Liquid	Maximum 9 metres/second	(30 feet/second)			
		Minimum 0.15 metres/second	(0.5 feet/second)			
Gas or steam	Maximum	13 to 62 metres/second (43 to 205 feet/second) depending on rotor pitch				
	Minimum	1 to 3.7 metres/second (3.5 to 12 feet/second) depending on rotor pitch				

Other installation considerations:**- Mounting position**

The RIM20 may be installed in vertical, horizontal, or angled pipe sections. The flowmeter is attached perpendicular to the axis of the pipe and should not be mounted 'upside-down' (with its top section hanging below the pipe mount). For liquid service, the fluid must completely fill the pipe.

- Site selection

The flow measurement location should be selected to minimize turbulence and swirl. The extent of these flow disturbances depends upon the piping configuration. Valves, elbows, pumps, and other piping components may add disturbances to the flow.

- Hot-tap compatibility

With the removable or permanent retractor assembly the RIM20 is 'hot-tappable' and can be installed and removed without shutting down the process. An isolation valve with a pipe mounting kit is used to isolate the flowmeter from the process.

Probe length	Standard length	S		
	Compact length - Only available for compression fitting connections CNPT, C150, C300 and C600	C	S	
	Extended length	E		
	Local mount NEMA 4X, IP66 Enclosure	L		
Electronics enclosure mounting	Remote electronics NEMA 4X, IP66 25' cable with display	R25		
	25' armored cable with glands (ATEX, IECEx) 'V' flowmeter only	A25		
	25' armored cable with glands (ATEX, IECEx) 'VT', 'VTP' flowmeter only	A25P	L	
	Remote electronics NEMA 4X, IP66 50' cable with display	R50		
	50' armored cable with glands (ATEX, IECEx) 'V' flowmeter only	A50		
	50' armored cable with glands (ATEX, IECEx) 'VT', 'VTP' flowmeter only	A50P		
Display	Digital display and programming buttons	D	D	
	12-36 Vdc, 25 mA, 1 W maximum required on loop powered flowmeters, 1HL only	DL		
Power supply	12-36 Vdc, 300 mA, 9 W maximum - use with 1H, 1M, 1B, 3H, 3M, 3B	DH		
	100-240 Vac, 50/60 Hz line power, 5 W maximum - use with 1H, 1M, 1B, 3H, 3M, 3B	AC	DL	
Output signal	Loop powered option - one analogue output (4-20 mA), one alarm, one pulse, HART®, DL input power only	1HL		
Inclusive of the scaled frequency output	One analogue output (4-20 mA), one alarm, one pulse, HART® communication protocol, DH or AC option only	1H		
	One analogue output (4-20 mA), one alarm, one pulse, MODBUS communication protocol, DH or AC option only	1M		
	One analogue output (4-20 mA), one alarm, one pulse, BACnet communication protocol, DH or AC option only	1B		
	Three analogue outputs (4-20 mA), three alarms, one pulse, HART® ('VT', 'VTP' only), DH or AC option only	3H		
	Three analogue outputs (4-20 mA), three alarms, one pulse, MODBUS ('VT', 'VTP' only), DH or AC option only	3M		
	Three analogue outputs (4-20 mA), three alarms, one pulse, BACnet ('VT', 'VTP' only), DH or AC option only	3B
